

SAFETY ON SNOW

WINTER 2021 2022

Chasing the unknown with 30 liters of clear conscience

Mobility-wise, it can't go far without you. But once you're together, you'll stay forever devoted to each other. ST stands for Ski Trip, from day tours to wilder adventures, the ST30 REACTOR is your loyal partner for those always venturing to see what's beyond the horizon. Equipped with our Airbag Reactor and Low Profile technologies, designed with waterproof and extremely resistant materials, and with precise fit...In blue or black, it's time to head off into the wild.

TOURING

Lightweight doesn't mean short on features

The Tour 25 Ultra-light Reactor sticks with you and hugs your back like a glove wherever you go. The LIGHTEST dual airbag backpack on the market, this form-fitting mesh coated tool is the go-to partner for vertical gain (and drop) maniacs.

A safety pack designed for when it's time to take action.

Intended for professionals and migratory birds, the Pro Flex range combines the technical expertise of the Reactor Airbag System with a well-designed storage compartment made with heavy-duty Cordura fabric. We left nothing to chance so you don't need a second one.

18 liters of eco-friendliness to take on the untamed world.

A big step into recycled fabric airbag backpacks, the Calgary Reactor range incorporates our latest design and technology while reducing its environmental impact. This preludes to the spirit and practice reconciliation: let the track wipe away.

Snow safety program

While the right gear may save your life, the right knowledge helps you to avoid accidents altogether

We at ARVA remain convinced that prevention is the best way to stay safe, and that the best safety gear includes the right risk analysis tools to avoid an accident altogether. Through our online training program, designed in partnership with ANENA, France's national institute for avalanche and snow science, we offer you the chance learn more about terrain analysis, human factors, and using the right rescue equipment to stay safe in avalanche terrain.

Nous avons la conviction que le meilleur équipement de sécurité est d'avoir les bons outils pour analyser les risques afin d'éviter l'accident. Dans ce programme de formation, conçu en partenariat avec l'ANENA (Association Nationale pour l'Étude de la Neige et des Avalanches), nous proposons d'approfondir les connaissances terrain, l'influence des facteurs humains et l'utilisation du matériel de secours.

Wir sind davon überzeugt, dass die beste Sicherheitsausrüstung darin besteht, über die richtigen Mittel zur Beurteilung des Risikos zu verfügen, um einen Unfall zu verhindern. Ziel und Zweck dieses in Partnerschaft mit dem französischen Lawinenforschungsinstitut ANENA (Association Nationale pour l'Étude de la Neige et des Avalanches) entwickelten Ausbildungsprogramms ist die Vertiefung der Kenntnisse über das Gelände, den Einfluss von menschlichen Faktoren und den Einsatz der Sicherheitsausrüstung.

Quiz

Test your knowledge by answering 10 questions on:
www.arva-equipment.com

Statistics

Odds of survival when buried

Chance de survie pour une personne ensevelie

18min → 91%
35min → 34%
60min → 30%

Avalanche accidents with one or more victims

Avalanches avec une victime ou plus

1 person → 78%
2 people → 13%
3 people → 7%
4 people → 2%

Rescue times based on equipment used

Temps de dégagement avec les différents équipements

1 person → 60 mn 1 person + 1 person → 25 mn 1 person + 1 person + 1 person → 11 mn

Neo Pro

All the essential "expert" features

REF: ARNINE04

Holster option (sold separately)
REF: ARZHOLNE04

FEATURES

70M search strip width.

Group check mode tests transmit frequency and power.

Marking function to identify burial victims already located.

Multiple burial indicator displays a "+" when more than 3 victims.

3 antennas to improve chances of finding a signal and for greater precision during the fine search.

Digital signal processing guides rescuer more efficiently towards the burial zone.

Auto-test lets the device run a diagnostic to verify that all main functionalities are working properly.

Backlit screen provides great contrast in any conditions or lighting.

Automatic revert-to-transmit mode

Interference management lets the user adjust the search technique in an area with considerable signal interference.

U-Turn alarm lets the rescuer know they are heading in the wrong direction.

Standby mode allows the user to keep their device switched on while shoveling.

Analog mode to take full advantage of the main antenna's maximum range.

Scrolling function to select the burial victim to search for.

Weight: 240g
(including batteries)

The NEO PRO is ARVA's new high-end transceiver. This device includes all the essential "expert" features for professional rescuers, such as an analog mode, a standby mode, and a SCROLLING function that allows you to target a specific victim during a search. The setup menu is easy to use, simply press on the "+" and "-" buttons to customize the device settings. The NEO PRO comes with a soft holster to fit a wide range of body shapes and sizes.

Le NEO PRO est l'appareil haut de gamme de la marque ARVA, il intègre toutes les fonctionnalités "expert" indispensables au secours professionnel telles que le mode analogique, le mode standby et la fonction SCROLLING permettant de cibler la victime recherchée. Son menu de paramétrage facile d'utilisation grâce aux touches "+" et "-" permettra aux utilisateurs de personnaliser leur appareil. Le NEO PRO est équipé d'un holster souple pour une meilleure adaptabilité à un large éventail de morphologies.

Das NEO PRO ist das neue Topmodell der Marke ARVA. Es verfügt über alle „Expertenfunktionen“, die für die professionelle Rettung unverzichtbar sind, wie z.B. Analog-Modus, Standby-Modus und SCROLLING-Funktion, welche es ermöglicht, die gesuchte Person aus einer Liste auszuwählen. Im Menü „Einstellungen“ lässt sich das Gerät mithilfe der Tasten "+" und "-" benutzerspezifisch konfigurieren. Das NEO PRO verfügt über ein Tragesystem aus weichem Material, um sich unterschiedlichen Körpergrößen anzupassen.

Analog

The analog mode is for advanced rescuers. This feature enhances reception range by transmitting the signal as an audible tone without the use of the digital processor.

Standby mode

A device in standby mode is neither searching nor transmitting. This function allows the user to work the avalanche without their device interfering with the ongoing search. In the event of a secondary avalanche, the revert to transmit function automatically switches the device back to transmit mode.

Search strip width

The search strip width corresponds to the area "scanned" by the searching device. The larger the search strip width, the greater the area covered by the device. This criterion is often used to compare beacon performance.

Evo 5

Maximum performance, minimal size

Holster option (sold separately)
REF: ARZHOLEVO5

REF: ARNIEVO5

The EVO5 capitalizes on ARVA's 35-year expertise to fit in the palm of your hand. Our R&D team pushed the size/performance ratio past the edge of the envelope to create a device that fits perfectly in your jacket pocket. With a 50m search strip width, group check, marking function, and an automatic revert-to-transmit mode, the EVO5 is jam packed with all of the essential functions needed to rescue an avalanche victim. Equipped with a backlit screen and a speaker that emits a precise, modulated beep, this transceiver will efficiently and effectively guide you to the burial zone.

L'EVO5 capitalise 35 ans de savoir-faire ARVA dans la paume de votre main. Le ratio compacité/performance a été poussé à son extrême par notre équipe R&D pour une intégration optimale dans la poche de votre veste. 50m de largeur de bande, mode GROUP CHECK, fonction marquage, retour automatique en émission, gestion des interférences, l'EVO5 est un concentré de toutes les fonctionnalités indispensables au secours de victimes en avalanche. Doté d'un écran rétro-éclairé et d'un haut-parleur générant un son précis et modulé, il vous guidera efficacement jusqu'à la zone d'ensevelissement.

Mit dem EVO5 halten Sie fünfunddreißig Jahre ARVA Know-How in der Hand. Beim Verhältnis kompaktes Design/Leistung ist unser F&E-Team bis an die Grenzen des Machbaren gegangen, damit das Gerät optimal in Ihre Jackentasche passt. Das EVO5 verfügt über alle zur Bergung von Lawinopfern erforderlichen Funktionen: 50 m Suchstreifenbreite, GROUP CHECK-Modus, Markierfunktion, automatische Rückkehr in den Sendemodus, Interferenz-Management. Ausgestattet mit einem Display mit Hintergrundbeleuchtung und einem Lautsprecher, der einen präzisen, modulierten Ton erzeugt, führt es Sie sicher zur Verschüttungsstelle.

FEATURES

50m search strip width

Group check mode tests transmit frequency and power.

Marking function to identify burial victims already located.

Multiple burial indicator displays a "+" when more than 3 victims.

3 antennas to improve chances of finding a signal and for greater precision during the fine search.

Digital signal processing guides rescuer more efficiently towards the burial zone.

Auto-test lets the device run a diagnostic to verify that all main functionalities are working properly.

Backlit screen provides great contrast in any conditions or lighting.

Automatic revert-to-transmit mode by a timer set up (8min).

Interference management lets the user adjust the search technique in an area with considerable signal interference.

U-Turn alarm lets the rescuer know they are heading in the wrong direction.

Compact minimalist device (111mm x 72mm x 20mm)

Weight: 165g (including batteries)

Revert-to-transmit:

During a search, in the event of a secondary avalanche, the return-to-transmit function allows the device to automatically switch back to transmit mode. This switch is activated by a timer after a certain period of time of user inactivity. The timeframe is set up by default to 8 min.

Interference management

Interference management maximizes the device's performance in search mode in an environment "overrun" by electromagnetic interference. To accomplish this, the device in search mode automatically reduces the search strip width and ignores all other frequencies to focus solely on the beacon being tracked. This function can be deactivated by the user.

Search strip width

The search strip width corresponds to the area "scanned" by the searching device. The larger the search strip width, the greater the area covered by the device. This criterion is often used to compare beacon performance.

Evo 4

Simple & reliable

REF: ARNIEVO4

Holster option (sold separately)
REF: ARZHOLEVO4

Our best seller, the EVO4 sets the standard for ease of use and accessibility. Designed with an intuitive display that performs well in any conditions, this device will appeal to a wide range of skiers and snowboarders aspiring to improve their avalanche rescue skills. The EVO4 is the ultimate ally in a multiple-burial search, with a marking function and a 3-victim indication on the display. The GROUP CHECK function verifies the transmit frequency and can easily test an entire fleet of transceivers. The CLIP FOR SAFE system ensures that your device automatically starts transmitting as soon as you clip in the shoulder strap.

Best-seller de la gamme, l'EVO4 est un modèle d'accessibilité. Doté d'une interface à la fois intuitive et performante, cet appareil conviendra à un large éventail de skieurs et snowboarders souhaitant développer leurs aptitudes techniques au secours en avalanche. Cet appareil sera votre meilleur allié en situation multi-victimes grâce à la fonction marquage et l'affichage de 3 victimes. Le mode GROUP CHECK incluant un contrôle de la fréquence d'émission permet de contrôler facilement un parc d'appareils. Le système CLIP FOR SAFE garantit à l'utilisateur que son appareil est automatiquement en mode émission à la fermeture de la sangle d'épaule.

Das EVO4, Bestseller der Reihe, ist ein Beispiel an Bedienungsfreundlichkeit. Das mit einer intuitiven und zugleich leistungsstarken Benutzeroberfläche ausgerüstete Gerät ist bestens geeignet für Skitourengeher, Freerider und Snowboarder, die ihre technischen Fähigkeiten bei der Lawinenrettung verbessern möchten. Dank seiner Markierfunktion und der Anzeige von 3 Verschütteten ist es optimal geeignet für Situationen, in denen nach mehreren von einer Lawine verschütteten Personen gesucht wird. Der GROUP CHECK Modus inklusive Kontrolle der Sendefrequenz ermöglicht es, eine Gruppe von Geräten zu kontrollieren. Das CLIP FOR SAFE System garantiert dem Benutzer, dass sein Gerät beim Schließen des Schultergurts automatisch in den Sendemodus schaltet.

FEATURES

40m search strip width

Group check mode tests transmit frequency and power.

Marking function to identify burial victims already located.

Multiple burial indicator displays a "+" when more than 3 victims.

3 antennas to improve chances of finding a signal and for greater precision during the fine search.

Digital signal processing guides rescuer more efficiently towards the burial zone.

Auto-test lets the device run a diagnostic to verify that all main functionalities are working properly.

Backlit screen provides great contrast in any conditions or lighting.

The EVO4 is equipped with our CLIP FOR SAFE system that ensures that the device automatically switches on when the user clips in the shoulder strap.

Weight: 240g
(including batteries)

Group check

The group-check function allows you to easily verify if every member of your group has their beacon in transmit mode. The group-check function enables the device to conduct a fine search, allowing you to individually check the members of your group at a one-meter distance.

Marking function

Once one victim is found, the marking function allows you to suppress their signal to focus on searching for other victims. The «marked» victim's signal is no longer indicated during the rest of the search.

Clip for safe

As soon as you put on your transceiver and clip the strap, it automatically activates and starts transmitting. This is an easy and convenient way to ensure that your device is in transmit mode, and increases everyone's safety when heading into the backcountry or off-piste.

Range overview

	Evo4	Evo5	Neo pro
Antennas	3	3	3
Signal	Digital	Digital	Digital & Analog
Search strip width in digital mode	40m	50m	70m
Maximum range in analog mode			80m
Auto check			
Group check (frequency control)			
Marking function			
Mutiple victim indicator	3+	3+	3+
Revert to transmit		Timer (8min)	Sensor
Interference management			
U-turn alarm			
Standby mode			
Scrolling function			
Weight	240g	165g	240g
Operating Life	250 h	220 h	350 h

Technology

Search strip width

The search strip width corresponds to the area "scanned" by the searching device. The larger the search strip width, the greater the area covered by the device. This criterion is often used to compare beacon performance.

La largeur de bande de recherche correspond à la largeur de la zone "scannée" par l'appareil en recherche. Plus la largeur de bande de recherche est importante, plus l'appareil couvre une grande zone de recherche. Elle est souvent utilisée pour comparer les performances des appareils.

Die Suchstreifenbreite entspricht der Breite des vom Gerät im Suchmodus „gescannt“ Bereichs. Je größer die Suchstreifenbreite ist, desto größer ist der vom Gerät abgedeckte Suchbereich. Sie wird häufig für den Leistungsvergleich unterschiedlicher Geräte herangezogen.

Auto check

When turning on, the device conducts an auto-check. This checks battery levels, that the device is functioning properly, and signals any problems.

Lors de la mise en route, l'appareil fait un auto-check. Il contrôle le niveau des piles, la bonne fonctionnalité de l'appareil et vous informe en cas de problème.

Beim Einschalten führt das Gerät einen Selbsttest durch. Es überprüft den Ladezustand der Batterien, die ordnungsgemäße Funktion des Geräts und informiert den Nutzer im Falle eines Problems.

Group check

The group-check function allows you to easily verify if each member of your group has its beacon in transmit mode. The group-check function enables the device to conduct a fine search, allowing you to individually check the members of your group at a one-meter distance.

La fonction group-check permet de s'assurer simplement que tous les membres d'un groupe portent un DVA en émission. La fonction group-check place l'appareil en recherche de proximité, permettant de contrôler chacun des membres du groupe individuellement en se plaçant à moins d'un mètre d'eux.

Mit der Gruppentest-Funktion lässt sich auf einfache Weise feststellen, ob alle Mitglieder der Gruppe ein im Sendemodus befindliches LVS-Gerät tragen. Für die Gruppentest-Funktion schaltet das Gerät auf Nahsuche, so dass der Gruppenleiter jedes einzelne Mitglied der Gruppe aus einer Distanz von unter einem Meter kontrollieren kann.

Frequency control

In group-check mode, the beacon equipped with a frequency check function will indicate if the other devices are transmitting properly at the international standard frequency of 457 kHz. All beacons on the market use this frequency, but it may deviate over time with use. If the frequency of the transmitting device deviates more than +/- 80 Hz, the beacon in group-check mode will indicate an error. If the frequency verification is measured, the deviation will be displayed on screen.

En mode group-check, l'appareil équipé de la fonction contrôle de fréquence indique si l'appareil en émission fonctionne bien sur la fréquence internationale de 457 kHz. Tous les appareils du marché utilisent cette fréquence mais peuvent cependant se décaler avec l'usure. Si la fréquence de l'appareil en émission est décalée de plus de + ou - 80 Hz alors l'appareil en mode group-check indique une erreur. Si le contrôle de fréquence se fait par mesure alors la déviation de fréquence est affichée.

Im Gruppentest-Modus zeigt das mit der Frequenzkontrolle ausgestattete Gerät an, ob das Gerät im Sendemodus die internationale 457 kHz Standardfrequenz verwendet. Alle im Handel erhältlichen Geräte verwenden diese Frequenz, können allerdings im Laufe der Zeit eine Abweichung aufweisen. Wenn die Frequenz des Geräts im Sendemodus um + oder - 80 Hz abweicht, zeigt das Gerät im Gruppentest-Modus einen Fehler an. Wenn die Frequenzkontrolle durch Messung erfolgt, wird die Frequenzabweichung angezeigt.

Revert-to-transmit

During a search, in the event of a secondary avalanche, the revert-to-transmit function allows the device to automatically switch back to transmit mode. This switch is activated either by a timer after a certain period of time of user inactivity, or by a motion detector after a certain amount of time where the device has not moved. Configure these timeframes in your beacon's settings menu.

Lors de la recherche, en cas de suravalanche, la fonction retour en émission permet de repasser l'appareil en émission automatiquement, sans action de l'utilisateur. Le retour en émission se fait soit par timer, c'est-à-dire après un délai sans action de l'utilisateur soit par détecteur de mouvement, après un délai sans mouvement de l'appareil. Ces délais sont paramétrables dans le menu de configuration de l'appareil.

Bei einer Nachlawine ermöglicht es die Funktion „Rückstellung in den Sendemodus“, das Gerät ohne Eingreifen des Benutzers automatisch vom Such- in den Sendemodus zu schalten. Die Rückstellung in den Sendemodus erfolgt entweder per Zeitschaltuhr (nachdem das Gerät eine bestimmte Zeit vom Benutzer nicht betätigt wurde) oder über Bewegungsmelder (nachdem das Gerät eine bestimmte Zeit nicht bewegt wurde). Diese Zeiten können im Konfigurationsmenü des Geräts programmiert werden.

Interference Management

Interference management maximizes the device's performance in search mode in an environment "overrun" by electromagnetic interference. To accomplish this, the device in search mode automatically reduces the bandwidth and ignores all other frequencies to focus solely on the beacon being tracked. This function can be deactivated by the user.

La gestion des interférences optimise les performances de l'appareil en recherche dans un environnement "pollué" par des interférences électromagnétiques. Pour se faire l'appareil en recherche réduit automatiquement la largeur de bande de recherche pour se concentrer sur le signal de l'appareil recherché en faisant abstraction des fréquences parasites. Cette fonction peut-être désactivée par l'utilisateur.

Das Interferenz-Management optimiert die Leistungseigenschaften des Geräts bei der Suche in einer durch elektromagnetische Störungen beeinträchtigten Umgebung. Hierfür reduziert das im Suchmodus befindliche Gerät automatisch die Suchstreifenbreite, um sich auf das Signal des gesuchten Geräts zu konzentrieren und Störfrequenzen auszublenden. Die Funktion kann vom Benutzer deaktiviert werden.

Marking function

Once a victim is found, the mark function allows you to ignore their signal to focus on searching for other victims. The "marked" victim's signal is no longer indicated during the rest of the search.

En recherche, une fois une victime localisée, la fonction marquage permet de faire abstraction de cette victime pour se concentrer sur la recherche d'une autre victime. Le signal de la victime "marquée" n'est alors plus pris en compte pour la suite de la recherche.

Wenn eine verschüttete Person lokalisiert wurde, ermöglicht es die Markierfunktion, diese Person auszublenden, um sich auf die Suche nach einem weiteren Verschütteten zu konzentrieren. Das Signal des „markierten“ Verschütteten wird bei der weiteren Suche nicht mehr berücksichtigt.

Standby mode

A device in standby mode is neither searching nor transmitting. This function allows the user to work the avalanche without their device interfering with the ongoing search. In the event of a secondary avalanche, the return-to-transmit function automatically switches the device back to transmit mode.

L'appareil en mode standby n'est ni en recherche, ni en émission. Cette fonction est destinée à travailler sur l'avalanche sans perturber les recherches avec les ondes de l'appareil. En cas de suravalanche, la fonction retour en émission remet automatiquement l'appareil en mode émission.

Im Standby-Modus ist weder die Such- noch die Sendefunktion aktiviert. Dieser Modus dient dazu, an einer Lawine zu arbeiten, ohne die Suche durch die elektromagnetischen Wellen des Geräts zu stören. Im Falle einer Nachlawine schaltet die Funktion „Rückstellung in den Sendemodus“ das Gerät automatisch wieder auf Senden.

Scrolling function

Victim selection allows you to more efficiently organize rescue operations by selecting a specific victim to track and dividing search responsibilities between rescuers. Although the victim's identity is not displayed, a list of victims is generated in order of proximity, allowing you to select a victim based on their distance from you.

La sélection de victimes permet d'organiser un secours en sélectionnant la victime recherchée pour répartir au mieux la recherche entre les secouristes. L'identité des victimes n'est pas affichée mais une liste de victime est créée dans l'ordre de proximité ce qui permet de sélectionner la victime en fonction de la distance.

Die Funktion „Auswahl der Verschütteten“ dient zur Organisation eines Rettungsvorgangs. Die gesuchte Person wird ausgewählt, um die Suche bestmöglich zwischen den Rettern aufzuteilen. Die Identität der verschütteten Personen wird nicht angezeigt. Es wird eine Liste der Verschütteten in der Reihenfolge der Signalstärke angezeigt.

Holsters

Evo4 holster REF: ARZHOLEV04

The EVO4 holster is designed for you to more efficiently and effectively use your avalanche transceiver. The EVO4 ON/OFF button keeper cord allows the user to easily clip their device to the holster. Sling the holster over your left or right shoulder depending on personal preference.

Le holster EVO4 a été conçu pour permettre une utilisation optimale de l'appareil. Le cordon de connexion du bouton ON/OFF EVO4 permettra à l'utilisateur de rattacher facilement son appareil au holster. Ce holster peut être porté avec la sangle d'épaule positionnée à droite ou à gauche selon le choix de l'utilisateur.

Das EVO4-Tragesystem wurde mit Blick auf eine optimale Nutzung des LVS-Geräts konzipiert. Mit der Verbindungsschnur der ON/OFF-Taste des EVO4 kann der Benutzer sein Gerät am Tragesystem befestigen. Der Schultergurt des Tragesystems kann je nach Vorliebe des Benutzers entweder rechts oder links positioniert werden.

Neo pro holster REF: ARZHOLNE04

The NEO PRO holster allows you to more efficiently and effectively use your avalanche transceiver. The form-fitting design hugs your body and the easy-to-use keeper cord makes this holster an essential companion for the NEO PRO. Sling the holster over your left or right shoulder depending on personal preference.

Le holster NEO PRO a été conçu pour permettre une utilisation optimale de l'appareil. Un profil étudié pour épouser la morphologie de l'utilisateur ainsi qu'un cordon de connexion facile à utiliser font de ce holster le compagnon indispensable du NEO PRO. Ce holster peut être porté avec la sangle d'épaule positionnée à droite ou à gauche selon la préférence de l'utilisateur.

Das NEO PRO-Tragesystem wurde mit Blick auf eine optimale Nutzung des LVS-Geräts konzipiert. Das durchdachte Design, das sich der Körperform des Benutzers anpasst, und die praktische Verbindungsschnur machen dieses Tragesystem zum unverzichtbaren Begleiter des NEO PRO. Der Schultergurt des Tragesystems kann je nach Vorliebe des Benutzers entweder rechts oder links positioniert werden.

Evo5 holster REF: ARZHOLEV05

The EVO5 holster is designed for you to more efficiently and effectively use of your avalanche transceiver. The EVO5 keeper cord is equipped with a carabiner that allows the user to easily clip their device to the holster. This holster allows users to choose between wearing the shoulder strap on the right or left. The waist strap can be detached from the holster and used as a belt.

Le holster EVO5 a été conçu pour permettre une utilisation optimale de l'appareil. Le cordon de connexion EVO5 équipé d'un mousqueton permettra à l'utilisateur de rattacher facilement son appareil au holster. Ce holster peut être porté avec la sangle d'épaule positionnée à droite ou à gauche selon le choix de l'utilisateur. La sangle ventrale peut être déconnectée du holster pour se transformer en ceinture.

Das EVO5-Tragesystem wurde mit Blick auf eine optimale Nutzung des LVS-Geräts konzipiert. Mit der mit einem Karabiner versehenen Verbindungsschnur des EVO5 kann der Benutzer sein Gerät am Tragesystem befestigen. Der Schultergurt des Tragesystems kann nach Belieben des Benutzers entweder rechts oder links positioniert werden. Der Bauchgurt kann vom Tragesystem getrennt und als Gürtel verwendet werden.

Safety packs

Evo4 safety pack

Evo4 + Access 240 probe + Access Shovel

REF: ARPACV3EVO4

Compact snow-safety set for beginners to experienced enthusiasts, includes an EVO4 transceiver, an ACCESS shovel, and an ACCESS 240 probe.

Pack secours format coffret intégrant un EVO4, une sonde ACCESS 240 et une pelle ACCESS

Lawinenset für Einsteiger und regelmäßige Anwender bestehend aus einem EVO4, einer ACCESS 240-Sonde und einer ACCESS-Schaufel.

Evo5 safety pack

Evo5 + Spark 240 Probe + Access TS Shovel

REF: ARPACV2EVO5

Compact snow-safety set that includes an EVO5 transceiver, an ACCESS TS shovel, and a SPARK 240 probe.

Pack secours format compact intégrant un EVO5, une sonde SPARK 240 et une pelle ACCESS TS.

Kompaktes Lawinenset bestehend aus einem EVO5, einer SPARK 240-Sonde und einer ACCESS TS-Schaufel.

NEW PRODUCT

Pack safety box Skitrip

Evo5 + Skitrip Probe + Skitrip Shovel

REF: ARPACV1SKITRIP

Snow-safety set for skiers and snowboarders who just love to travel, includes an EVO5 transceiver, a SKI TRIP shovel, and a SKI TRIP probe.

Le pack des skieurs et snowboarders amateurs de voyage, intégrant un EVO5, une sonde SKITRIP et une pelle SKITRIP.

Lawinenset für reisefreudige Skitourengeher, Freerider und Snowboarder bestehend aus einem EVO5, einer SKITRIP-Sonde und einer SKITRIP-Schaufel.

NEW PRODUCT

Pack safety box Pro

Neo Pro + Guide 260 Probe + Axe shovel

REF: ARPACV2NE04

Snow-safety set for mountain professionals, intended for patrollers, guides, and all those who love winter exploration.

Le pack secours du professionnel de la montagne, dédié aux pisteurs, guides et afficionados de l'exploration hivernale.

Lawinenset für den professionellen Einsatz bestimmt für Pistenwarte, Bergführer und passionierte Wintersportler.

Probes

The probe is an essential tool for precisely locating someone buried in an avalanche. Our extremely sturdy and reliable probes are lightweight, compact, and quick to deploy for maximum efficiency during the fine search.

	Stiffness	User-friendly	Lightweight
FLASH LOCK	★★	★★★	★★★★
PIN LOCK	★★	★★★	★★★★
RACK LOCK	★★★★	★★★	★★

The pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.

Compact 30cm long tube segments make this probe easy to stow in your pack

Grip for easy handling

Stainless steel probe tension cable

Probes

Access 240

190g - Ø 11mm
REF: SOACC240V1

Equipped with the FLASH LOCK locking system, the ACCESS 240 probe is reliable, lightweight, and will work for most off-piste and backcountry enthusiasts. The cone inserts at the end of each tube segment and the pull handle make deploying this probe quick and easy in emergency situations.

Dotée du système de verrouillage FLASH LOCK, la sonde ACCESS 240 est fiable et légère, elle conviendra à un grand nombre de pratiquants. Les inserts coniques en extrémité de tubes et la poignée de verrouillage facilitent le montage de la sonde en situation d'urgence.

Die mit dem FLASH LOCK-Verriegelungssystem ausgerüstete zuverlässige, leichte Lawinsonde ACCESS 240 ist für die meisten Wintersportler geeignet. Die konischen Einsätze an den Schaftenden und der Verriegelungsgriff erleichtern die Montage der Sonde in Notfallsituationen.

FEATURES

- 2.40m probe when fully deployed, 6 segments 40cm long
- 11mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Ultra-lightweight Kevlar tension cord.
- FLASH LOCK locking system uses a quick and effective knot to lock your probe when deployed.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Cone inserts make it easy to assemble the tube segments
- Precise markings on probe indicate snow depth

Race 240

120g - Ø 10mm
REF: SORAC240V1

Light as a feather and with no bulk, the RACE 240 probe is designed for ski-mountaineering competitions. It meets ISMF and PDG equipment standards and can be shortened to 2.10 meters by removing a segment.

Avec un poids plume et un encombrement minimal, la sonde RACE 240 est destinée à la compétition de ski alpinisme. Elle répond aux exigences de la norme ISMF et PDG peut se transformer en sonde de 2.10 m en retirant un brin.

Die Lawinsonde RACE 240, ein Federgewicht mit minimalem Packmaß, ist für Wettkämpfe im Skibergsteigen bestimmt. Sie erfüllt die Anforderungen der ISMF- und PDG Verordnung und kann durch Entfernen eines Segments in eine 2,10 m lange Sonde umgebaut werden.

FEATURES

- 2.40m probe when fully deployed, 8 segments 30cm long
- Compact 30cm long tube segments make this probe easy to stow in your pack.
- 10mm diameter tubes
- Ultra-lightweight carbon fiber tubing
- Ultra-lightweight Kevlar tension cord.
- FLASH LOCK locking system uses a quick and effective knot to lock your probe when deployed.
- Probe meets ISMF equipment standards.
- Precise markings on probe indicate snow depth

Spark 240

250g - Ø 12mm
REF: SOSPA240V1

Efficient and effective in any conditions, the SPARK probe combines simplicity with unparalleled versatility. Incredibly compact, this probe is the ideal companion for all your ski or snowboard adventures.

Efficace en toutes conditions, la sonde SPARK combine un design épuré à une polyvalence hors norme. Sa compacité optimale en fera un compagnon idéal pour toutes vos aventures à ski ou snowboard.

Die bei allen Bedingungen effiziente SPARK-Lawinsonde kombiniert schlichtes Design mit extremer Vielseitigkeit. Ihr optimales Packmaß macht sie zum idealen Begleiter bei allen Ski- und Snowboardtouren.

FEATURES

- 2.40m probe when fully deployed, 8 segments 30cm long
- 30cm segments make it easy to stow this probe in your backpack.
- 12mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord.
- PIN LOCK locking system makes it quick and easy to deploy your probe by simply pulling on the handle.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Precise markings on probe indicate snow depth

NEW PRODUCT

Ski Trip

290g - Ø 12mm
REF : SOSKI240V1

Equipped with our RACK LOCK cable tension system and compact tube segments, the SKI TRIP probe is a true ally in any rescue situation. Compact and lightweight, this probe will fit perfectly into any gear kit for skiers and snowboarders who love to travel and explore snow-covered terrain.

Dotée du système de mise en tension par câble RACK LOCK et de brins compacts, la sonde SKI-TRIP sera votre meilleur allié en situation de secours. Compact et légère, cette sonde s'intégrera à la perfection dans la panoplie des skieurs et snowboarders amateurs de voyages et explorations sur neige.

Die SKITRIP-Sonde mit RACK LOCK-System und kompakten Segmenten ist der ideale Begleiter für alle reisenden Skitourengeher und Freerider.

FEATURES

- 2.40m probe when fully deployed, 8 segments 30cm long
- 30cm segments make it easy to stow this probe in your backpack
- 12mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord
- RACK LOCK locking system allows you to quickly pull the tension cable tight when deploying your probe by simply pulling on the handle
- The pull handle makes it easy to deploy and tension the probe and snaps conveniently onto the main tube
- Cone inserts make it easy to assemble the tube segments
- Grip for easy handling
- Precise markings on probe indicate snow depth
- Pouch with printed step-by-step avalanche rescue instructions

Guide 260

360g - Ø 13mm
REF: SOGUI260V1

Designed for mountain professionals the GUIDE 260 combines sturdiness and search precision thanks to the 13mm diameter tube and RACK LOCK locking system.

Destinée aux professionnels de la montagne, la sonde GUIDE 260 allie résistance et précision en recherche grâce au diamètre de 13mm et au verrouillage par système RACK LOCK.

Die für professionelle Bergretter und Bergführer bestimmte Lawinsonde GUIDE 260 mit einem Durchmesser von 13 mm und RACK LOCK Arretierung kombiniert robuste Beschaffenheit und Suchpräzision.

FEATURES

- 2.60m probe when fully deployed, 7 segments 37.5cm long
- 13mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord.
- RACK LOCK locking system allows you to quickly pull the tension cable tight when deploying your probe by simply pulling on the handle.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Cone inserts make it easy to assemble the tube segments
- Grip for easy handling
- Precise markings on probe indicate snow depth

Rescue 300

400g - Ø 13mm
REF: SORES300V1

The RESCUE 300 probe is designed for professionals and backcountry enthusiasts in areas of the world where the snowpack is consistently deep. The 13mm diameter tube along with the combined cable and RACK LOCK locking system make this an extremely sturdy and precise probe.

La sonde RESCUE 300 s'adresse aux professionnels du secours et pratiquants dans des secteurs géographiques où le manteau neigeux est fréquemment épais. Son diamètre de 13mm et son système de verrouillage par câble et RACK LOCK en font une sonde robuste et précise.

Die Lawinsonde RESCUE 300 wendet sich an professionelle Rettungskräfte und Wintersportler in Gegenden, in denen häufig dicke Schneedecken anzutreffen sind. Die robuste, präzise Sonde verfügt über einen Durchmesser von 13 mm und ein Arretierungssystem aus Stahlkabel und RACK LOCK.

FEATURES

- 3.00m probe when fully deployed, 8 segments 37.5cm long
- 13mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord.
- RACK LOCK locking system allows you to quickly pull the tension cable tight when deploying your probe by simply pulling on the handle.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Cone inserts make it easy to assemble the tube segments
- Grip for easy handling
- Precise markings on probe indicate snow depth

Shovels

Digging out someone buried in an avalanche is often the longest phase of a rescue. This is why we design our shovels for maximum effectiveness and efficiency. Extremely lightweight, with a telescoping shaft, or designed for professional use, we have the right shovel for your needs.

Shovels

Access 510g
REF: PEACCESSV4

Now available with a 2mm thick reinforced blade, the ACCESS shovel provides an excellent balance between packability, weight, and shoveling efficiency. It will perform well for a wide range of skiers and snowboarders.

Désormais disponible avec un godet renforcé de 2mm d'épaisseur, la pelle ACCESS est un excellent compromis entre compacité, poids et efficacité, elle conviendra à un large public de skieurs et snowboarders.

Die jetzt mit einem verstärkten Schaufelblatt von 2 mm Dicke verfügbare ACCESS-Schaufel bietet einen hervorragenden Kompromiss zwischen kompakter Bauweise, Gewicht und Effizienz und ist für alle Skitourengerher, Freerider und Snowboarder geeignet.

FEATURES

- Overall shovel length: 64cm
- Oval aluminum shaft, 43cm long
- Strong and durable aluminum blade
- Optimized blade size: 24cm length x 24cm width x 2.0mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic T-grip handle

Access TS 620g
REF: PEACCESSTSV4

Regular backcountry and sidecountry riders will naturally gravitate towards the ACCESS TS shovel. Equipped with a telescopic shaft, this shovel proves extremely effective in any rescue situation without compromising on weight or packability. The 2mm thick reinforced blade and oval shaft makes it a reliably rigid and durable rescue tool.

Les amateurs de sorties régulières hors des domaines skiables se tourneront naturellement vers le modèle ACCESS TS. Grâce à son manche télescopique, cette pelle se révèle d'une grande efficacité en situation de secours sans compromettre ni le poids, ni la compacité. Son godet d'épaisseur 2.0 mm et son manche ovoïde lui confèrent rigidité et durabilité.

Skifahrer, die regelmäßig im Backcountry unterwegs sind, wählen das Modell ACCESS TS. Die leichte, kompakte Lawinenschaufel mit Teleskopschaft erweist sich in Rettungssituationen als besonders effizient. Das 2,0 mm dicke Schaufelblatt und der Teleskop-schaft bürgen für Steifigkeit und Langlebigkeit.

FEATURES

- Shovel with telescopic shaft: 57cm minimum length, 72cm maximum length
- Oval aluminum shaft, 35cm long when collapsed
- Strong and durable aluminum blade
- Optimized blade size: 24cm length x 24cm width x 2.0mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic T-grip handle

Ski Trip 620g
PESKITRIPV2

Capable in any conditions, the SKI TRIP shovel combines a simple design with incredible versatility. Its amazing packability makes the SKI TRIP shovel the ideal companion for all of your skiing or snowboarding adventures.

Efficace en toutes conditions, la pelle SKI TRIP combine un design épuré à une polyvalence hors norme. Sa compacité optimale en fera un compagnon idéal pour toutes vos aventures à ski ou snowboard.

Die bei allen Bedingungen effiziente SKI TRIP-Lawinenschaufel kombiniert schlichtes Design mit extremer Vielseitigkeit. Ihr optimales Packmaß macht sie zum idealen Begleiter bei allen Ski- und Snowboardtouren.

FEATURES

- Shovel with telescopic shaft: 62cm minimum length, 76cm maximum length
- Oval aluminum shaft, 45cm long when collapsed
- Strong and durable anodized aluminum blade
- New compact blade: 28cm length x 23cm width x 2.0mm thick (size includes blade-to-shaft connection)
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together
- Ergonomic T-grip handle
- UIAA certification process in progress for standard "156 – Avalanche Rescue Shovels

Plume TS 490g
REF: PEPLUMEV8

The PLUME TS shovel, the telescopic version of the PLUME, is equipped with our new extremely lightweight and compact blade, which means speed and efficiency when shoveling, incredible durability, and no extra weight.

Dotée du nouveau godet ultraléger et compact, la pelle PLUME TS est la variante télescopique du modèle PLUME offrant une efficacité de pelletage accrue et une grande durabilité sans compromettre la légèreté.

Ausgestattet mit dem neuen ultraleichten, kompakten Schaufelblatt, bürgt die Lawinenschaufel PLUME TS, Variante mit ausfahrbarem Teleskopschaft des PLUME-Modells, für hohe Schaufelleistung, ohne das Gewicht zu erhöhen.

FEATURES

- Shovel with telescopic shaft: 62cm minimum length, 76cm maximum length
- Oval aluminum shaft, 45cm long when collapsed
- Strong and durable anodized aluminum blade
- New compact blade: 25cm length x 21cm width x 1.5mm thick (size includes blade-to-shaft connection)
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together
- Ergonomic, easy to hold, T-grip handle
- UIAA certification process in progress for standard "156 – Avalanche Rescue Shovels

CERTIFICATION PROCESS IN PROGRESS

Ultra 300g
REF: PEULTRAV7

Designed for ski-mountaineering, the ULTRA shovel is the ultra-lightweight model in the range for use in competition when the avalanche risk is minimal. It meets ISMF and PDG standards.

Pelle de ski alpinisme, la pelle ULTRA est le modèle ultraléger de la gamme pour une pratique compétition quand le risque d'avalanche est maîtrisé, ce produit est en conformité avec les normes ISMF et PDG.

Die ULTRA-Lawinenschaufel für Skibergsteiger ist das Ultraleichtgewicht der Modellreihe für Wettkämpfe mit beherrschbarem Lawinenrisiko. Das Produkt stimmt mit den ISMF- und PDG-Vorschriften überein.

FEATURES

- Overall shovel length: 67cm
- Ultra-lightweight carbon-fiber shaft, 47cm long
- Strong and durable anodized aluminum blade
- Optimized blade size: 21cm length x 21cm width x 1.5mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic T-grip handle
- Meets ISMF and PDG standards

Plume 380g
REF: PEPLUMEV7

Equipped with a carbon-fiber shaft and a 1.5mm thick aluminum blade, the PLUME shovel is designed for users looking to strike the right balance between weight and shoveling efficiency.

Avec un manche carbone et un godet aluminium de 1.5mm d'épaisseur, la pelle PLUME s'adresse aux utilisateurs recherchant un compromis optimal en légèreté et efficacité de pelletage.

Die PLUME-Lawinenschaufel mit einem Carbonschaft und einem 1,5 mm dicken Schaufelblatt aus Aluminium wendet sich an Anwender, die nach einem optimalen Kompromiss zwischen Gewichtseinsparung und Effizienz beim Schaufeln suchen.

FEATURES

- Overall shovel length: 70cm
- Ultra-lightweight carbon-fiber shaft, 47cm long
- Strong and durable anodized aluminum blade
- Optimized blade size: 24cm length x 24cm width x 1.5mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic T-grip handle

Axe 710g
REF: PEAXEV4

Equipped with the new compact ARVA blade, designed and shaped to make it easy to step on and efficient to dig with in any type of snow, the AXE shovel will prove more than trustworthy in any rescue situation. It converts into a hoe for increased shoveling efficiency when you need to move snow fast.

Dotée du nouveau godet compact ARVA dont le profil a été conçu pour faciliter l'appui avec le pied et réaliser des coupes de neige précises et efficaces, la pelle AXE sera votre meilleur allié en situation de secours. Cette pelle est convertible en pioche pour une efficacité accrue en phase de pelletage.

Die AXE-Schaufel mit dem neuen kompakten ARVA-Schaufelblatt, das es ermöglicht, die Schaufel leichter in den Schnee zu treten und Schneeblöcke präzise und effizient zu stechen, ist Ihr bester Helfer in Notfallsituationen. Um die Effizienz beim Schaufeln zu erhöhen, kann die Schaufel in eine Hacke umgebaut werden.

FEATURES

- Shovel with telescopic shaft: 73cm minimum length, 89cm maximum length
- Oval aluminum shaft, 49cm long when collapsed
- Strong and durable anodized aluminum blade
- New compact blade: 31cm length x 23cm width x 2.0mm thick (size includes blade-to-shaft connection)
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic Z-grip handle
- Converts into a hoe
- Shovel handle easy to grip.
- UIAA certification process in progress for standard "156 – Avalanche Rescue Shovels

Pro 830g
REF: PEPROV4

Designed for professionals, the PRO shovel focuses on efficiency. With a reinforced D-shaped grip, a long telescopic shaft, and a high-volume heavy-duty blade, this is the quintessential tool for those who work in a snow-covered environment. The oval shaft and acetabular plastic grip provide exceptional durability.

Destiné aux professionnels, le modèle PRO met l'accent sur l'efficacité. Dotée d'une poignée D renforcée, un long manche télescopique et un godet plus volumineux, cette pelle est l'outil de travail sur neige par excellence. Son manche ovoïde et sa poignée en Acétal lui confèrent une durabilité exceptionnelle.

Bei dem für professionelle Anwender bestimmten PRO-Modell steht die Effizienz im Vordergrund. Ausgestattet mit einem verstärkten D-förmigen Griff, einem langen Teleskopschaft und einem größeren Schaufelblatt, ist diese Schaufel das Arbeitsgerät par excellence für den Einsatz im Schnee. Der ovale Schaft und der Griff aus Acetal machen sie zu einem besonders robusten Produkt.

FEATURES

- Shovel with telescopic shaft: 76cm minimum length, 96cm maximum length
- Oval aluminum shaft, 53cm long when collapsed
- Strong and durable anodized aluminum blade
- New compact blade: 31cm length x 23cm width x 2.0mm thick (size includes blade-to-shaft connection)
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- D-grip handle made with POM ACETAL, strong and durable in frigid conditions
- Shovel handle easy to grip.

Ski Trip 26

Volume: 26L

Weight: 1140g

Every day, right by your side

Made with high-performance materials, designed for freeride adventures, the ST26 also proves a great companion when traveling or on a stroll through the city. Streamlined and rain resistant, take this backpack wherever you want to go. Conçu avec des matériaux haute performance pour la pratique du freeride, le ST26 se révèle également excellent en voyage et en ville. Résistant à la pluie et extrêmement épuré, il vous accompagnera partout.

Elegant, vielseitig, funktionell und effizient, der ST26 ist unser technisch ausgefeiltester Freetouring-Rucksack. Er begleitet Sie auf Ihren Freeride-Touren, Skihochtouren oder Ski-Trips bei allen Wetterbedingungen.

NEW
PRODUCT

FEATURES

Compact, easy access 26L backpack.

Lightweight waist belt that folds into the back panel when needed.

Two ice axe loops.

Quick and easy A-frame or diagonal ski carry system.

Carry options for a snowboard or snowshoes.

Compatible with the ARVA helmet holder.

Equipped with our versatile Daisy Chain system

Dedicated external pocket for snow-safety equipment.

Water repellent, 52cm long, thermoformed back panel designed with our 3D-FIT adjustment system and equipped with our removable ALU-FIT technology.

Dedicated external pocket for goggles or small valuables.

Removable sternum strap with emergency whistle.

Materials: PFC-free N400D PU2 ripstop fabric.

YKK AquaGuard® zippers.

REF: SAST26V1
Black

Multi-purpose straps

A streamlined design means no longer having to compromise. Using our Daisy Chain system and multi-purpose straps, this backpack is capable of carrying skis, a snowboard, ice axes, as well as any other piece of essential gear. When used for compression, these straps create a more streamlined and close fit on those outings when your pack is not fully loaded.

N400D PU2 fabric

Since our intent was to create a pack that will endure the worst weather conditions possible, we used N400D PU2 ripstop fabric for its waterproofness as well as its abrasion and tear resistance. All that along with a PFC-free coating.

Foldable, stowable waist belt

While essential for any up or downhill adventure, the waist belt can feel unwieldy on your everyday excursions around town. This is why we designed built-in compartments behind the back panel to fold up and stow the waist belt for even more streamlined pack.

Water resistant

To tackle the snow, rain, and any other wet environment, this pack is designed with YKK AquaGuard® zippers and N400D PU2 fabric. It is water resistant and will never let you down when the going gets tough.

Ski Trip 30

Volume: 30L

Weight: 1150g

Elegance and technical prowess

Ready for any conditions, the ST30 combines a simple design with unparalleled versatility. Its mission is to venture with you wherever you decide to travel.

Prêt à affronter toutes les conditions, le ST30 combine un design très épuré à une polyvalence hors norme.

Sa mission n'est ni plus ni moins que de vous accompagner dans tous vos voyages.

Der allen Bedingungen trotzende ST30 kombiniert schlichtes Design mit extremer Vielseitigkeit. Er wird Sie auf allen Reisen zuverlässig begleiten.

FEATURES

Large 30L capacity pack with top and side access.

Ergonomic waist belt equipped with two large side pockets and two gear loops.

Two ice axe loops.

Quick and easy A-frame or **diagonal ski** carry system.

Carry options for a **snowboard** or **snowshoes**.

Compatible with the **ARVA helmet holder**.

Equipped with our versatile **Daisy Chain system** combined with our multifunctional **strap system** for attaching any accessories you need.

Dedicated internal **snow-safety** gear pocket.

Water repellent, 52cm long, thermoformed back panel designed with our 3D-FIT adjustment system and equipped with our removable ALU-FIT technology.

Two dedicated external pockets for **goggles** or small valuables.

Sternum strap with emergency whistle.

Materials: PFC-free N400D PU2 ripstop fabric.

YKK AquaGuard® zippers.

Lid with magnetic buckles

Since efficiency is so important to us, we developed a system to open and close your backpack even quicker. Open the buckles and pull on the red loops to open the main compartment as wide as possible. To close, pull the drawcord and place the lid. The magnetic buckles will close the pack in an instant.

Snow safety equipment storage system.

Compatible with multiple hydration systems and features a tube protection sleeve.

Dedicated pocket for goggles or other small valuables.

ALU-FIT back panel.

Materials: 140Dx210D polyamide CORDURA ripstop HR / 330D polyamide ripstop for excellent weather resistance.

ALU-FIT back panel

We developed ALU-FIT technology to provide you with exceptional support and comfort. The more you wear your pack, the more the back panel molds to your physique for the perfect fit.

Quick-access front panel pocket

This low-volume pocket on the outside of your pack's front panel allows you to stow thin gear that requires quick access, such as a shovel blade, a map, or a pair of skins.

Reinforced construction for heavy-duty use
CORDURA is a synthetic fabric with 3 times the abrasion resistance of other typical polyamide fabrics. While durable and incredibly robust, it remains relatively thin and lightweight. 40Dx210D CORDURA polyamide ripstop HR is a thin fabric with a highly-resistant coating that can withstand the toughest conditions.

NEW PRODUCT

FEATURES

Compact 18L backpack.

Lightweight waist belt.

Quick and easy A-frame ski carry system.

Carry options for a snowboard or skateboard.

Compatible with the ARVA helmet holder.

Dedicated external pocket for snow-safety equipment.

Water repellent thermoformed back panel.

Dedicated external pocket for small valuables.

Compatible with a 15" laptop computer.

Removable sternum strap with emergency whistle.

Materials: 300D polyester as well as a 150D polyester lining, both made with recycled plastic.

YKK zippers.

Quick and easy side straps to carry your skis
Attach skis to your pack in just two clips. The A-frame ski carry system works especially well for wide skis and spreads the load more evenly. We also recommend using a strap to secure the ski tips and spread the tails apart.

Recycled fabrics
This product was designed using recycled materials and robust fabrics to make it greener and more sustainable in order to limit our impact on the environment as much as possible. We use 300D polyester as well as 150D polyester liners that are both made with recycled plastic.

Enhanced freedom of movement
The streamlined waist belt combine with the heat-formed back panel provides more flexibility and greater freedom of movement all day long.

Integrated helmet holder with its own storage pocket.

Dedicated external pocket for snow-safety equipment.

Water repellent thermoformed back panel, 48cm long.

Dedicated external pocket with NYLEX lining for goggles or other small valuables.

Compatible with a 15" laptop computer.

Removable sternum strap with emergency whistle.

Materials: 300D polyester as well as a 150D polyester lining, both made with recycled plastic.

YKK zippers.

H2O hydration-tube sleeve
The shoulder strap is equipped with a streamlined zippered sleeve to protect your hydration tube as well as keep it out of the way. It also serves to protect the tube from frigid temperatures and the elements.

Integrated helmet holder
Since it is better to play it safe and always carry your helmet with you, we included a removable helmet holder compatible with all helmets currently on the market."

Recycled fabrics
This product was designed using recycled materials and robust fabrics to make it greener and more sustainable in order to limit our impact on the environment as much as possible. We use 300D polyester as well as 150D polyester liners that are both made with recycled plastic.

Removable waist belt

We believe that an ergonomic waist belt is essential for maximum support on any freeride backcountry or sidecountry outing. In addition to providing comfort and stability, it reduces the load on your back and shoulders. Whenever you venture on an outing where carrying a lighter pack is more important than maximum support, remove the waist belt in just a few seconds to reduce weight and bulk.

Eco-design X Picture Organic Clothing

Sustainability is in Picture Organic Clothing's genes. This year we pushed the concept of our co-designed project even further by making a very technical, high-performance, and uniquely stylish backpack with a reduced overall impact on the environment. We use 300D polyester as well as 150D polyester liners that are both made with recycled plastic.

How is recycled polyester different from virgin polyester?

Since the recycling process regenerates the fiber at the molecular level, there is absolutely no difference between recycled polyester and virgin polyester. While both are identical in terms of performance and durability, recycled polyester makes much less of an impact on the environment.

Why is recycled polyester better?

1. Recycled polyester does not require additional oil resources, which reduces our overall carbon footprint by reducing demand for extracting petroleum.
2. Producing recycled polyester generates four times less CO2 emissions that when making virgin polyester.
3. Recycling plastic offers the opportunity to reuse resources instead of throwing them away.

Removable waist belt

We believe that an ergonomic waist belt is essential for maximum support on any freeride backcountry or sidecountry outing. In addition to providing comfort and stability, it reduces the load on your back and shoulders. Whenever you head on an outing where carrying a lighter pack is more important than maximum support, remove the waist belt in just a few seconds to reduce weight and bulk.

Airbag Reactor

Designed and developed entirely by ARVA's engineering team, the ARVA REACTOR avalanche airbag backpack is the result of 2 full years of R&D and more than 30 years of experience at the highest level working with snow safety gear. At only 680g, it is the lightest, most compact, and highest performing dual Airbag System on the market. Made in France, the REACTOR avalanche Airbag System is designed exclusively for ARVA backpacks. We oversee the entire process from design through production to provide you with the highest level of performance and safety.

AIRBAG REACTOR

Airbag Reactor

Positioning matters

SINGLE AIRBAG

DUAL AIRBAG

Lift area and stability / Surface de poussé et stabilité / Auftriebsfläche und Stabilisierung des Körpers

One size fits all

Our 3D-FIT technology allows you to optimally adjust your REACTOR avalanche airbag backpack:

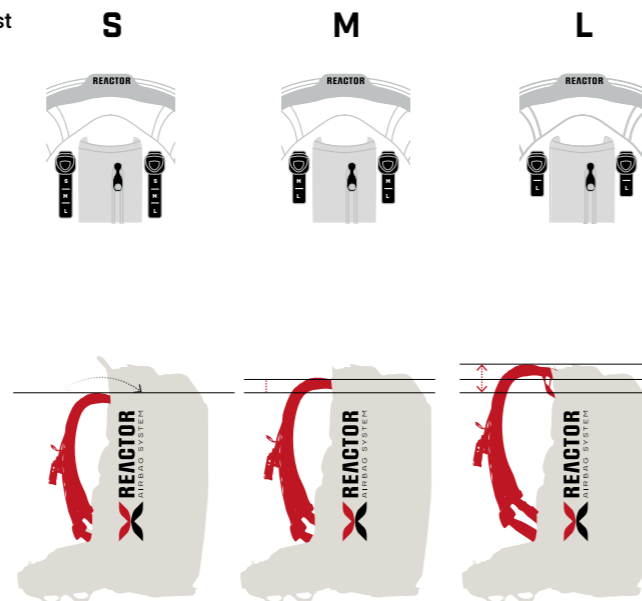

- Adjust shoulder strap length,
- Adjust torso length,
- Adjust trigger handle position.

La technologie 3D fit vous permet un réglage optimal de votre sac airbag reactor :

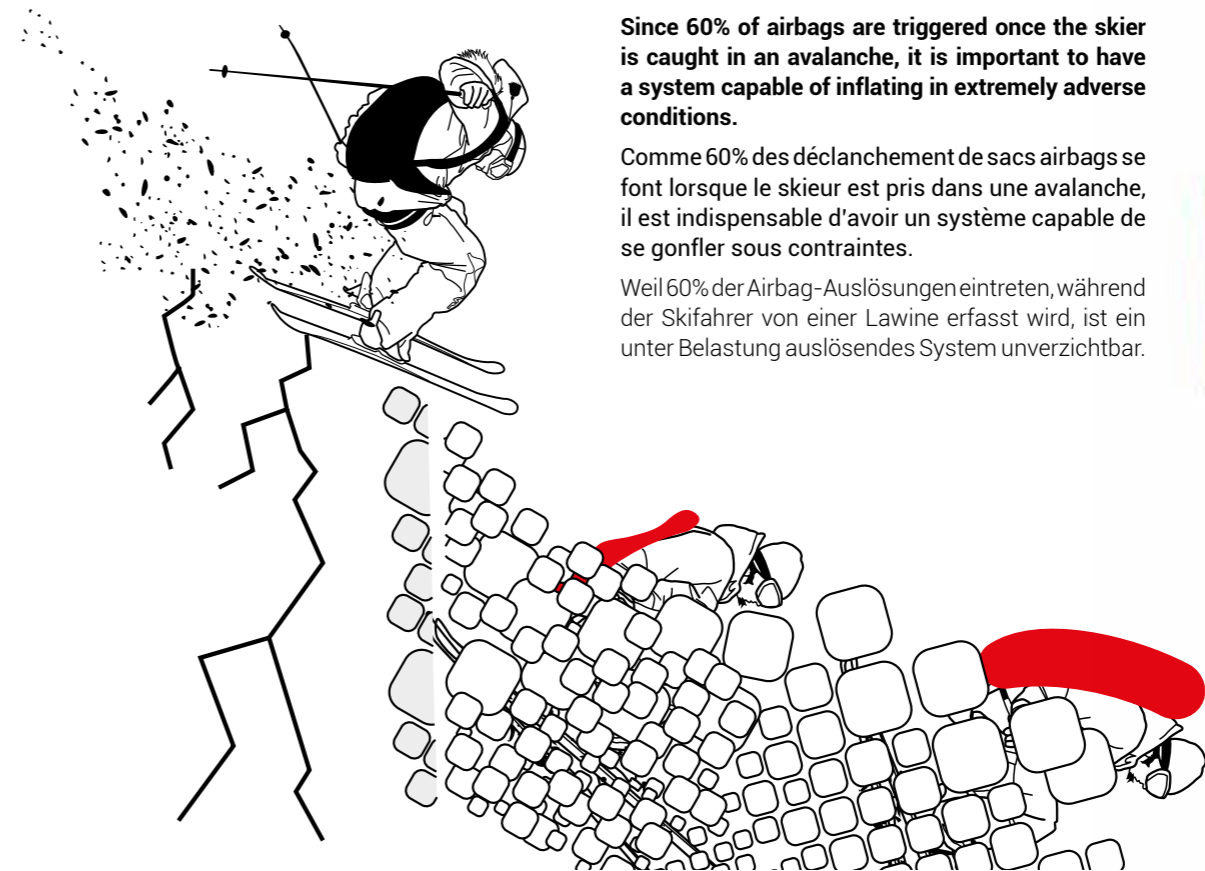

- Longueur des bretelles
- Longueur de dos
- Hauteur de la poignée

Die 3D-Fit-Technologie ermöglicht eine optimale Anpassung des Reactor-Airbags:

- Länge der Schulterträger
- Länge der Rückenpartie
- Höhe des Griffs

The ultimate inflation system

Since 60% of airbags are triggered once the skier is caught in an avalanche, it is important to have a system capable of inflating in extremely adverse conditions.

Comme 60% des déclenchement de sacs airbags se font lorsque le skieur est pris dans une avalanche, il est indispensable d'avoir un système capable de se gonfler sous contraintes.

Weil 60% der Airbag-Auslösungen eintreten, während der Skifahrer von einer Lawine erfasst wird, ist ein unter Belastung auslösendes System unverzichtbar.

2 Airbags are safer than one!

In an avalanche, natural debris can damage an airbag, luckily we have two!

Dans une avalanche les éléments naturels peuvent détériorés un ballon, heureusement nous en avons deux !

Bei einem Lawinenabgang kann es passieren, dass ein Ballon beschädigt wird, zum Glück haben wir zwei!

AIRBAG REACTOR

Ski Trip 30

Volume: 30L

Weight: 2120g

Your favorite travel partner

Ready for any conditions, the ST30 REACTOR combines a simple, streamlined design with our REACTOR avalanche airbag technology. Extremely rugged and versatile, this pack will venture with you wherever you decide to travel.

Le ST30 REACTOR incarne un style épuré et une technicité raffinée. Rien n'a été laissé au hasard, chaque ligne a été optimisée pour tirer profit du tissu ripstop N400D PU2 et ainsi offrir le sac airbag le plus performant, polyvalent, endurant et élégant jamais créé.

Der allen Bedingungen trotzende ST30 REACTOR kombiniert schlichtes Design mit unserer REACTOR Airbag-Technologie. Er ist extrem vielseitig, wetterfest und der ideale Begleiter für Ihre Skireisen

NEW PRODUCT

FEATURES

REF: AIR1ST30V1BLACK
Without Airbag: AIRXST30V1

Multi-purpose straps

A streamlined design no longer means having to compromise. Using our Daisy Chain system and multi-purpose straps, the backpack is capable of carrying skis, a snowboard, ice axes, as well as any other piece of gear that you consider essential. These straps can be used for compression on outings when your pack is not full, making the product even more streamlined and close-fitting.

Lid with magnetic buckles

Since efficiency is so important to us, we developed a system to open and close your backpack even quicker. Open the buckles and pull on the red loops to open the main compartment as wide as possible. To close, pull the drawcord and place the lid. The magnetic buckles will close the pack in an instant.

Internal pocket for snow-safety gear

Since we know how important it is to always carry your snow-safety gear with you, we built a specific compartment for your shovel and probe. Designed to keep your shovel and probe readily accessible whatever the load, you will forget they are in this completely separate and closed compartment most of the time, yet have split-second access in an emergency situation. When placed in their dedicated sleeves, your shovel and probe will not move an inch (or even a centimeter). This pack provides you with the means to be more organized and efficient.

3D-FIT

Our 3D-FIT system allows you to quickly adjust your pack to your fit preferences and body size for maximum comfort. Select S, M, or L in just one pull to instantly adjust back height, shoulder strap length, and the position of the REACTOR trigger handle for the perfect fit. This pack provides you with the means to be more organized and efficient.

AIRBAG REACTOR

Calgary 18

Volume: 18L

Low Profile

Through our new, innovative LOW PROFILE technology, we decided to completely revamp the design our REACTOR avalanche airbag backpacks by integrating the airbag into the pack itself. The latest generation of packs designed with our LOW PROFILE technology means a more compact size, enhanced load distribution, and new features like the option of carrying skis in an A-Frame.

Thermoformed back panel

Since you may not have the biggest body frame, this thermoformed back panel is shorter than on our other REACTOR avalanche airbag backpacks. It is designed for freeriders of all shapes and sizes: men, women, and kids. Comfortable and water resistant, this heat-formed back panel will hug your back to provide form-fitting support.

The very first eco-designed avalanche airbag backpack

At ARVA, we believe that performance should not take precedence over the environment. This is why we decided to develop the market's first ever avalanche airbag backpack made primarily with recycled fabrics. We revamped our usual design process to reduce the number of components and the complexity when assembling each part to limit fabric scraps and waste during production. To continue down the path of sustainability, the REACTOR Airbag System is designed, manufactured, and assembled in our home country of France. All of our subcontractors are located within an 80km radius of our headquarters.

Reactor Airbag System

Weighing in at a mere 680g, our ARVA REACTOR avalanche Airbag System is the lightest Airbag System on the market, all categories combined. The two 75L airbags means a redundant safety system in the event of an accident. The most powerful Airbag System on the market, the compact design and position inside the backpack guarantee a well-balanced load and an exceptional level of safety.

AIRBAG REACTOR

Tour 25 UL

Volume: 18L

Weight: 1280g

Lighter than ever!

The TOUR 25 Ultralight REACTOR is designed for backcountry enthusiasts looking for an ultra-lightweight avalanche airbag backpack that doesn't sacrifice functionality on an all-day tour.

Le TOUR 25 Ultralight REACTOR est destiné aux randonneurs à la recherche d'un sac airbag ultraléger, sans sacrifier l'aspect fonctionnel pour toutes les sorties à la journée.

Der TOUR 25 Ultralight REACTOR ist für Wanderer bestimmt, die nach einem ultraleichten Lawinenrucksack suchen, aber auf gewisse funktionelle Eigenschaften bei einer Tagestour nicht verzichten möchten.

NEW PRODUCT

FEATURES

Large Capacity: 25L.

Equipped with the ARVA REACTOR Airbag System.

LOW PROFILE airbag compartment.

Front access to main compartment.

Waist belt equipped with two large quick-access mesh pockets.

Two ice axe loops.

Diagonal ski-carrying system.

Removable straps for carrying skis in an A-Frame or diagonally, a snowboard, or snowshoes.

Daisy Chain system compatible with ARVA helmet holder.

Elastic support straps for safety gear.

Easy-access pocket for valuables.

Ultra-lightweight shoulder straps equipped with elastic pockets for a 500ml flask or water bottle.

Ultra-lightweight back panel with removable ventilated foam padding.

Removable emergency whistle.

Adjustable left/right leg safety loop.

Materials: Recycled polyamide 330D

ROBIC REGEN lightweight, highly-durable fabric.

TUV GS certified.

Complies with EN16716 standards.

YKK zippers.

Ultra-lightweight construction

1600 grams, including the REACTOR Airbag System and the carbon-fiber canister. To reach this feather weight, we revamped our design and applied a minimalist approach without sacrificing safety or comfort.

LOW PROFILE

Through our new, innovative LOW PROFILE technology, we decided to completely revamp the design our REACTOR avalanche airbag backpacks by integrating the airbag into the pack itself. The latest generation of packs designed with our LOW PROFILE technology means a more compact size, enhanced load distribution, and new features like the option of carrying skis in an A-Frame.

Removable carry straps

To save weight, the carrying features are limited to the strict minimum needed for most situations: a diagonal ski-carry system and 1 ice axe loop. When an adventure calls for more, use the removable straps (included) to carry your skis in an A-Frame, a snowboard, a second ice axe,...

Quick access mesh pockets

To save time during your backcountry adventures we equipped the shoulder strap and waist belt with mesh pockets. These elastic pockets provide quick access to all those essentials you need in a jiffy: your gloves, beanie, skins, water bottle, sunglasses,... The mesh pocket on the shoulder strap lets you stow a 500ml flask or a small water bottle for split-second hydration when you need it.

3D-FIT

Our 3D-FIT system allows you to quickly adjust your pack to your fit preferences and body size for maximum comfort. Select S, M, or L in just one pull to instantly adjust back height, shoulder strap length, and the position of the REACTOR trigger handle for the perfect fit.

Diagonal ski carry system

Carrying your skis diagonally keeps them from interfering with airbag deployment in the event of an avalanche. Reversible, our system allows you to choose the diagonal direction in which you would like to carry your skis.

ROBIC fabric

ROBIC fabric is a synthetic that is 50% tougher and 2.5 times more abrasion resistant than a classic polyamide fabric. This enhanced toughness provides us with a thin, lightweight fabric to use that has a longer lifespan than typically used fabrics.

R Vest

Volume: 15L

Weight: 2160g

A second skin, comfort was our number one priority

The REACTOR VEST 15 is ideal for carrying the rescue essentials. Conveniently stow your tools and other handy items without the bulk of a backpack.

Le REACTOR VEST 15 est le produit idéal si vous ne voulez emporter que l'essentiel. Vous aurez toujours vos petits objets à portée de main tout en évitant l'encombrement d'un sac à dos.

Die REACTOR VEST 15 ist die ideale Lösung, wenn Sie nur das Nötigste mitnehmen möchten. Sie haben alle kleinen Dinge, die Sie benötigen, stets in Reichweite, ohne sich mit einem Rucksack zu beschweren.

FEATURES

Capacity: 15L divided between 3 compartments and 6 front pockets.

Equipped with the ARVA REACTOR Airbag System.

Integrated waist belt and leg safety loop.

Two ice-axe loops.

Diagonal left or right side ski carrying system.

Snowboard and snowshoe carrying system.

Compatible with the ARVA helmet holder.

Snow-safety gear attachment system.

Designed with 4 strap loops to clip a wide variety of accessories and tools.

TAILOR-FIT and adjustable shoulder straps.

Elastic side adjustment straps.

Thermoformed back panel, 48cm long.

Sternum strap includes an emergency whistle.

Made with tough and highly durable N500D and ROBIC P100D.

Reinforced front panel.

TUV GS certified.

Complies with EN16716 standards.

YKK Zippers.

MOLLE system compatibility
For even greater modularity, we have designed the shoulder straps on our vest with strap loops that meet MOLLE (Modular Lightweight Load-carrying Equipment) standards. You can easily clip a radio or a wide variety of third-party accessories that comply with this standard.

Unparalleled stability
We focused all of our efforts on carrying comfort and stability. This is why we completely redesigned the airbags, to bring the R15 VEST's center of gravity as close to your back as possible. Nothing will be able to throw you off balance.

A second skin

Comfort was our number one priority. The R15 VEST comes in two sizes and adjusts to all body shapes and builds using the TAILOR-FIT shoulder straps and adjustable elastic side straps. With the heat-formed back panel and the well-distributed load across your upper body, your shoulders move freely and it feels like you are not carrying anything on your back at all.

1 REACTOR STEEL CANISTER EU

200 ML. / 490g / ARGON 300 BAR. 1LBS

The 200ml and 17cm long steel REACTOR canister takes up almost no space in your REACTOR avalanche airbag backpack. Built with high-strength steel and no welds, it complies with EN ISO 9808-1 standards, Directive 2010/35/EU & ADR/RID:2011, as well as IATA (table 2.3 A) regulations for baggage carried by passengers. Gas used: argon (UN1006), division 2.2. Pressure rating when filled: 300 bars (4351 PSI). Test pressure rating: 450 bars (6527 PSI). Burst pressure rating: >600 bars (8702 PSI).

Avec un volume de seulement 200ml et une hauteur de 17cm, la bouteille acier Reactor n'occupe presque pas d'espace dans votre sac Reactor. Construite dans un acier de très haute résistance et sans soudure, en conformité avec la norme EN ISO 9808-1, Directive 2010/35/EU & ADR/RID:2011 ainsi qu'à la réglementation IATA (tableau 2.3.A) pour le transport aérien des bagages par des passagers. Gaz utilisé: argon (UN1006), division 2.2. Pression interne 300 bar. Pression d'épreuve: 450 bar. Pression de rupture > 600 bar.

Die 17 cm hohe Reactor-Stahlkartusche mit einem Volumen von nur 200 ml beansprucht nur wenig Platz in Ihrem Reactor-Rucksack. Sie ist aus höchstfestem Stahl und ohne Schweißnaht hergestellt und entspricht der Norm EN ISO 9808-1, der Richtlinie 2010/35/EU & ADR/RID:2011 sowie den IATA-Vorschriften für den Luftverkehr (Tabelle 2.3.A) für gefährliche Güter, die durch Passagiere befördert werden. Verwendetes Gas: Argon (UN1006), Division 2.2. Innendruck 300 bar. Prüfdruck: 450 bar. Berstdruck > 600 bar.

2 REACTOR CARBON CANISTER

250 ML. / 320g / NITROGEN 300 BAR. 0.68LBS

The steel liner and carbon-fiber coating create an extremely reliable and lightweight canister that weighs only 320g. The carbon REACTOR cylinder complies with ISO 11119-3 standards, Directive 2010/35/EU & ADR/RID:2011, as well as IATA (table 2.3 A) regulations for baggage carried by passengers.

Liner en acier inoxydable et enrobage en fibre de carbone pour une fiabilité optimale et un poids minimal, seulement 320g. La bouteille carbone Reactor est conforme aux à la norme ISO 11119-3, Directive 2010/35/EU & ADR/RID:2011 ainsi qu'à la réglementation IATA (tableau 2.3.A) pour le transport aérien des bagages par des passagers.

Mit rostfreiem Stahl ausgekleidete und mit Carbonfaser umwickelte Kartusche für optimale Zuverlässigkeit bei minimalem Gewicht: nur 320 g. Die Reactor-Carbonkartusche entspricht der Norm ISO 11119-3, der Richtlinie 2010/35/EU & ADR/RID:2011 sowie den IATA-Vorschriften für den Luftverkehr (Tabelle 2.3.A) für gefährliche Güter, die durch Passagiere befördert werden.

BOTTLE WEIGHT SCALE

REF: AIRREFILLSTATION
REF RIFILL KIT : AIRREFILLKIT

REFILL SYSTEM FOR REACTOR CANISTER

The REACTOR REFILL SYSTEM is the first refill system that offers retailers and professional organizations an easy and reliable way to refill their own ARVA REACTOR sealed canisters. A sealed canister is extremely reliable when compared to a canister equipped with its own refill mechanism and additional connectors. Made with two compressed-air entry holes, this system allows the user to use a cascade refill system without having to disconnect the source of breathable compressed air (EN12021).

Le Reactor Refill System est le premier système de remplissage qui permet aux détaillants et organisations professionnelles de remplir leurs propres bouteilles ARVA REACTOR scellées de manière simple et fiable. La bouteille scellée garantit un très haut niveau de fiabilité comparé à une bouteille munie d'un mécanisme de remplissage et de raccords additionnels. Doté d'une double entrée d'air comprimé, il permet d'utiliser la technique de remplissage en cascade simplement et sans déconnecter la source d'air comprimé (EN12021).

Das Reactor Refill System ist das erste Nachfüllsystem, das Fachhändlern und Berufsorganisationen die Möglichkeit gibt, ihre eigenen versiegelten ARVA REACTOR-Kartuschen einfach und zuverlässig zu befüllen. Die versiegelte Kartusche garantiert im Vergleich zu einer mit einem Füllmechanismus und zusätzlichen Anschlüssen versehenen Kartusche ein sehr hohes Maß an Zuverlässigkeit. Da sie über einen doppelten Drucklufteinlass verfügt, kann zum Befüllen die Kaskadentechnik angewendet werden, ohne die Zufuhr der Atem-Druckluft (EN12021) zu unterbrechen.

3 REACTOR STEEL CANISTER US

200 ML. / 530g / ARGON 300 BAR. 1.29LBS

The 200ml steel US REACTOR canister takes up almost no space in your REACTOR avalanche airbag backpack. Built with high-strength steel with no welds, it complies with North American 3AA CYLINDERS.DOT/TC standards, as well as IATA (table 2.3 A) regulations for baggage carried by passengers. Gas used: argon (UN1006), division 2.2. Pressure rating when filled: 4351 PSI. Test pressure rating: 7250 PSI.

Avec un volume de seulement 200ml, la bouteille acier US Reactor n'occupe presque pas d'espace dans votre sac Reactor. Construite dans un acier de très haute résistance et sans soudure, en conformité avec les normes nord-américaines 3AA CYLINDERS.DOT/TC ainsi qu'à la réglementation IATA (tableau 2.3.A) pour le transport aérien des bagages par des passagers. Gaz utilisé: argon (UN1006), division 2.2. Pression interne 4351 PSI. Pression d'épreuve: 7250 PSI.

Mit einem Volumen von nur 200 ml beansprucht die US-Reactor-Stahlkartusche nur wenig Platz in Ihrem Reactor-Rucksack. Sie ist aus höchstfestem Stahl und ohne Schweißnaht hergestellt und entspricht den nordamerikanischen Normen 3AA CYLINDERS.DOT/TC sowie den IATA-Vorschriften für den Luftverkehr (Tabelle 2.3.A) für gefährliche Güter, die durch Passagiere befördert werden. Verwendetes Gas: Argon (UN1006), Division 2.2. Innendruck 4351 PSI. Prüfdruck: 7250 PSI.

4 REACTOR REFILLABLE STEEL CANISTER

275ML / COMPRESSED AIR / 630g / 22,22 OZ

Our higher-volume steel refillable 275ml canister maintains the same inflation speed at less pressure. This canister can be refilled with compressed air (EN12021 standards) by individuals trained in using the REACTOR REFILL SYSTEM. Designed for cascade refills without having to unplug the source of compressed air. Made with high-strength steel without welds, it complies with North American 3AA CYLINDERS.DOT/TC standards, as well as IATA (table 2.3.A) regulations for baggage carried by passengers. Test pressure rating: 7250 PSI.

La bouteille acier remplissable a une capacité de 275ml pour maintenir le niveau de performance de gonflage avec une pression plus faible. Elle est remplissable à l'air comprimé (norme EN12021) par des personnes formées à l'utilisation du Reactor refill system. Adaptée au remplissage en cascade sans déconnexion de la source d'air comprimé. Construite dans un acier de très haute résistance et sans soudure, en conformité avec les normes nord-américaines 3AA CYLINDERS.DOT/TC ainsi qu'à la réglementation IATA (tableau 2.3.A) pour le transport aérien des bagages par des passagers. Pression d'épreuve: 7250 PSI.

Die wiederbefüllbare Stahlkartusche hat ein Volumen von 275 ml, um die Aufblasleistung bei einem geringeren Druck zu gewährleisten. Sie kann von Personen, die in der Anwendung des Reactor Refill Systems ausgebildet sind, mit Druckluft (Norm EN 12021) befüllt werden. Geeignet für eine Kaskadenfüllung ohne Unterbrechung der Druckluftquelle. Sie ist aus höchstfestem Stahl und ohne Schweißnaht hergestellt und entspricht den nordamerikanischen Normen 3AA CYLINDERS.DOT/TC sowie den IATA-Vorschriften für den Luftverkehr (Tabelle 2.3.A) für gefährliche Güter, die durch Passagiere befördert werden. Prüfdruck: 7250 PSI.

Underhelmet

REF: CHZBALAV2

We have updated this face protection classic. The ARVA BALACLAVA provides great protection from the cold and wind. We altered the design to provide even greater comfort. Its 6FIT construction and elastic fabric offers an extremely comfortable fit, even under a helmet.

Nous avons fait évoluer un grand classique de la protection du visage. La cagoule ARVA BALACLAVA protège toujours autant contre le froid et le vent. Nous avons changé la construction pour vous apporter plus de confort. Avec la construction 6FIT et son tissu stretch, elle vous procurera un confort optimum immédiat en s'intégrant parfaitement sous un casque.

Die ARVA BALACLAVA-Sturmhaube, ein Klassiker in Sachen Gesichtsschutz, wurde weiterentwickelt. Um den Komfort des Benutzers zu verbessern, wurde ihr Aufbau verändert, während sie nach wie vor den gleichen effektiven Schutz vor Kälte und Wind bietet. Mit der 6FIT-Konstruktion und ihrem Stretchgewebe bietet sie maximalen Komfort und passt perfekt unter einen Helm.

Xtrem balaclava

REF: CHZBALAXTV2

In addition to providing enhanced protection in bad weather, the XTREM BALACLAVA'S practical design allows you to wear it 4 different ways depending on conditions. With its 6FIT construction, the XTREM BALACLAVA provides maximum comfort in addition to incredible warmth, even when worn under a helmet. En plus d'apporter une protection accrue contre les intempéries, la BALACLAVA XTREM propose 4 possibilités d'usage qui se montreront très pratique en fonction de l'évolution des conditions. Avec la construction 6FIT, nous poussons encore plus loin la performance de la cagoule BALACLAVA XTREM en apportant un confort optimum, même lorsqu'elle est utilisée sous un casque.

Die BALACLAVA XTREM bietet nicht nur wirksamen Wetterschutz, sondern auch 4 verschiedene Tragemöglichkeiten, ein praktisches Detail, um sich den Veränderungen der Wetterbedingungen anzupassen. Dank der 6FIT-Konstruktion bietet die Sturmhaube BALACLAVA XTREM auch beim Tragen unter einem Helm optimalen Komfort.

Radio holster

REF: SARADIOHOLV2

The ARVA radio holster works just as well for righties and lefties thanks to its rotating buckles. The holster features a heavy-duty dedicated smartphone pocket as well as a large flat zippered pocket for maps and documents. The holster adjustment system is designed for most professional and amateur radios. Le porte radio ARVA s'adapte aussi bien aux gauchers qu'aux droitiers grâce à ses attaches sur pivot. Il dispose d'une poche renforcée spécifique pour le rangement d'un smartphone ainsi qu'une grande poche plate zippée qui accueillera des documents ou cartes. Avec son système de réglage, l'emplacement destiné au portage de la radio s'adaptera à une grande majorité des appareils professionnels ou de loisirs. Das ARVA-Funkgerätheholster ist sowohl für Links- als auch für Rechtshänder geeignet. Es verfügt über ein verstärktes Smartphonefach und ein großes, flaches Reißverschlussfach für Dokumente oder Karten. Dank seines Einstellsystems lässt sich das Tragesystem den meisten Funkgeräten für den professionellen Einsatz oder Freizeitaktivitäten anpassen.

Rescue

Rescue blanket 190g

REF: PRCOU190

Durable enough to be used several times, this 190g survival blanket reflects 90% of your body heat when the shiny side faces in. When facing out, the shiny side will reflect the sun's infrared rays to keep you cool. Whenever you bivvy, the 190g can serve as a ground cover for your tent with the shiny side up to reflect heat into the tent and keep moisture out.

Assez résistante pour être utilisée à multiples reprises, la couverture de survie 190g est capable de réfléchir 90% de la chaleur corporelle lorsque la partie brillante est placée à l'intérieur. Placée à l'extérieur, la partie brillante va réfléchir les rayons infrarouges du soleil pour vous garder au frais. Lors de bivouacs la couverture de survie 190g peut être placée sous votre tente avec la partie réfléchissante vers le haut pour vous isoler de l'humidité du sol et vous réfléchir de la chaleur.

Die für mehrmaligen Gebrauch geeignete haltbare Rettungsdecke von 190 g kann 90 % der Körperwärme reflektieren, wenn die glänzende Seite nach innen gewandt ist. Nach außen gewandt reflektiert die glänzende Seite die Infrarotstrahlen der Sonne, um Sie vor der Hitze zu schützen. Beim Biwakieren kann die 190 g Rettungsdecke mit der reflektierenden Seite nach oben unter das Zelt gelegt werden, um die Bodenfeuchtigkeit abzuhalten und die Wärme zu Ihnen zu reflektieren. Achtung: Nicht bei Gewitter oder in der Nähe von glühenden Gegenständen benutzen.

FEATURES

Size: 220cm x 140cm
Waterproof
Shiny-silver/Matte-silver facing
 Reflects 90% of your body heat
 Insulates from both cold and heat
 Reusable
 PE 70

Emergency bivvy

REF: PRBIEMERG2

If you're forced to spend an unexpected night outdoors, the EMERGENCY BIVVY bivvy sack will keep you warm and dry. This bivvy sack reflects 90% of your body heat back to you, and protects you from wind, rain, and snow. Ultralight and compact, the EMERGENCY BIVVY is a great addition to the emergency gear you carry on hikes, bike rides, when camping, as well as in your car. This bivvy sack is your best friend on a cold night out in the mountains while enjoying the stars. Made with tear-resistant, aluminum-coated polyethylene, it can be repaired if needed.

Si vous êtes amené à passer une nuit dehors, comptez sur l'EMERGENCY BIVVY pour vous garder au sec et au chaud. Réfléchissant 90% de votre chaleur corporelle, il vous protégera du vent, de la pluie et de la neige. Très léger et ultra compact, il complètera votre kit de secours pour la randonnée, le vélo, le camping ou votre voiture. Il sera également votre meilleur allié pour ne pas attraper froid en passant la nuit à observer les étoiles en pleine montagne. Fabriqué en polyéthylène enduit d'aluminium, il est résistant à la déchirure et est réparable en cas d'accroc.

Wenn Sie planen, eine Nacht im Freien zu verbringen, verlassen Sie sich auf den EMERGENCY BIVVY, um Sie trocken und warm zu halten. Er reflektiert 90 % der Körperwärme und schützt Sie vor Wind, Regen und Schnee. Der besonders leichte, ultrakompakte Biwi ist eine optimale Ergänzung der Notfallausrüstung zum Wandern, Biken, Camping und fürs Auto. Außerdem verhindert er, dass Sie sich beim Beobachten der Sterne nachts in den Bergen erkälten. Er wird aus aluminiumbeschichtetem Polyethylen hergestellt, ist weiterreißfest und lässt sich im Falle eines Risses reparieren.

FEATURES

oversized stuff sack for easy stowing
Tinder cord drawstring for emergency fire starting
Rescue whistle to signal for help

Rescue blanket 60g

REF: PRCOU60

This compact, ultra-lightweight, 60g survival blanket will follow you on any adventure. With the gold-colored side facing out, the survival blanket captures the sun's infrared rays to warm up the rescue victim while the silver-colored side reflects 90% of their body heat. In the event of extreme heat, you may want to prevent the body from heating up too much. In this case, place the gold-colored side against your body to let heat escape and the silver-colored side facing out to reflect the sun's infrared rays. Warning: do not use this survival blanket during a thunderstorm or near incandescent materials.

Très compact et ultralégère, la couverture de survie 60g vous suivra dans toutes vos aventures. En mettant la face dorée vers l'extérieur, la couverture de survie va capter les rayons infrarouges du soleil pour réchauffer la personne secourue pendant que la face argentée va réfléchir 90% de la chaleur corporelle. En cas de forte chaleur, vous pouvez être amené à vouloir limiter le réchauffement du corps. Dans ce cas, mettez la face dorée contre vous pour laisser sortir la chaleur émise par le corps et la face argentée réfléchir les rayons infrarouges du soleil. Attention : Ne pas utiliser en cas d'orage ou près de matières incandescentes.

Die sehr kompakte, ultraleichte Rettungsdecke mit einem Gewicht von 60 g begleitet Sie bei allen Abenteuern. Wenn Sie die goldene Seite nach außen drehen, nimmt die Rettungsdecke die Infrarotstrahlen der Sonne auf, um die verletzte Person zu wärmen, wohingegen die silberne Seite 90 % der Körperwärme reflektiert. Bei großer Hitze muss der Körper vor Erhitzung geschützt werden. Drehen Sie in diesem Fall die goldene Seite nach innen, so dass die vom Körper abgegebene Wärme nach außen geleitet wird und die Infrarotstrahlen der Sonne von der silbernen Seite reflektiert werden. Achtung: Nicht bei Gewitter oder in der Nähe von glühenden Gegenständen benutzen.

FEATURES

Size: 220cm x 140cm
Extremely compact
Waterproof
Gold/Silver facing
Reflects 90% of your body heat
Insulates from both cold and heat

Escape lite bivvy

REF: PRBIESCL

Comfortable, breathable, and durable bivvy sack.

A bivvy sack that breathes : Keeps you dry from the inside out, and protects you against the elements so that you stay dry even in the most extreme conditions. Reflects 70% of your body heat: Staying warm and dry in any situation is essential! Versatile, it can be used as an overbag for your sleeping bag, an emergency bivvy sack, or a lightweight sleeping bag in the summer.

Lightweight and compact: The Escape Lite allows you to lighten the load and takes up very little space in your pack.

Four-season weather resistant: This puncture and tear-resistant fabric is made for intense use.

Sac de bivouac respirant, léger, compact et durable.

Un sac de bivouac qui respire : Vous gardant au sec de l'intérieur vers l'extérieur et très résistant aux intempéries, vous restez au sec en toutes circonstances.

RÉFLÉCHIT 70% DE LA CHALEUR CORPORELLE : Vous garder au chaud et au sec en toute situation est une priorité ! Polyvalent, il peut être utilisé comme doublure de sac de couchage, sac de bivouac d'urgence ou comme sac de couchage d'été ultraléger.

Léger et compact : L'Escape Lite vous permet d'alléger votre chargement et prend peu de place dans votre sac à dos.

Résistant à toutes les saisons : Le tissu est résistant aux perforations et aux déchirures lors d'une utilisation intensive.

Atmungsaktiver, leichter, kompakter und haltbarer Biwaksack.

Ein atmungsaktiver biwaksack : Er leitet Feuchtigkeit nach außen ab und ist extrem wetterfest, so dass Sie bei allen Bedingungen im Trocknen bleiben.

Reflektiert 70 % der Körperwärme : Sie in jeder Situation warm und trocken zu halten, hat Priorität! Er ist vielseitig einsetzbar und kann als Außenhülle um den Schlafsack, als Biwaksack für den Notfall oder als leichter Sommerschlafsack benutzt werden.

Leicht und kompakt : Der Escape Lite ermöglicht es Ihnen, das Gewicht der Ausrüstung zu reduzieren und nimmt nur wenig Platz im Rucksack ein.

Für alle Jahreszeiten geeignet : Das Gewebe weist eine gute Durchstich- und Weiterreißfestigkeit bei intensivem Gebrauch auf.

Escape bivvy zip

REF: PRBIESCZ

The ESCAPE ZIP bivvy sack resolves the main complaint with lightweight backcountry shelters regarding condensation produced from body heat. With ESCAPE technology condensation is no longer an issue, and you will never again have to choose between staying dry or staying warm. The unique material developed by SOL, experts in emergency survival gear, allows moisture to escape while keeping snow, wind, and rain out. It reflects 70% of your body heat to keep you warm all night long. Waterproof seams, a drawstring hood closure, a side zipper, as well as ample volume allow you to use this comfortable bivvy sack as an overbag for your sleeping bag to gain 10°C in warmth or as a lightweight and comfortable sleeping bag down to 10°C on summer nights. The high-visibility orange exterior makes it easy for rescuers to spot you in an emergency, even in areas with high tree cover.

Le sac de bivouac ESCAPE ZIP répond aux principaux reproches faits aux abris d'urgence léger. Accumuler de la condensation lorsque vous vous réchauffez n'est plus d'actualité. Avec la technologie ESCAPE la condensation n'est plus un problème, et vous n'aurez plus jamais à choisir entre rester au sec et rester au chaud. Le tissu exclusif développé par SOL, expert dans les produits d'urgence, permet à l'humidité de s'échapper tout en gardant la pluie, la neige et le vent à l'extérieur. Il vous réfléchit 70% de la chaleur de votre corps pour vous maintenir au chaud toute la nuit. Les coutures imperméables, la capuche à serrage par cordelette, l'ouverture zippée ainsi que le grand volume intérieur vous permettent d'utiliser avec un grand confort le sac de bivouac comme sur-sac de couchage pour gagner 10°C de chaleur ou comme sac de couchage léger et confortable pour les nuits estivales jusqu'à 10°C. L'extérieur orange haute visibilité permet aux sauveteurs de vous repérer facilement en cas d'urgence, même dans les zones à forte couverture forestière.

Auf den ESCAPE ZIP-Biwaksack trifft der größte gegen leichte Notunterkünfte erhobene Vorwurf nicht zu. Dass sich Kondenswasser im Innern aufbaut, sobald Ihnen warm wird, ist jetzt Vergangenheit.

Mit der ESCAPE-Technologie stellt Kondenswasser kein Problem mehr dar und Sie stehen nicht mehr vor der Wahl, ob Sie es lieber trocken oder warm haben möchten. Das exklusiv von SOL, Hersteller von Überlebensausrüstung, entwickelte Gewebe lässt Feuchtigkeit entweichen und hält Regen, Schnee und Wind auf der Außenseite. Es reflektiert sogar 70 % der Körperwärme zurück ins Innere, um Sie die ganze Nacht über warm zu halten. Wasserdichte Nähte, eine Kapuze mit Kordelzug, die Reißverschlussöffnung und das großzügige Innenvolumen ermöglichen es, den Biwaksack über dem Schlafsack zu verwenden, um 10°C Wärme zu gewinnen, oder ihn als leichten, komfortablen Schlafsack für sommerliche Nächte bei Temperaturen bis 10°C zu nutzen. Durch die hochsichtbare orangefarbene Außenseite sind Sie im Notfall für die Rettungskräfte auch in dicht bewaldeten Gegenden leicht zu finden.

FEATURES

Size: 213cm x 79cm
Weight: 241g
Reflects 70% of your body heat
Breathable
